

A quiet place to be *honest* with yourself.

Warm near-black, editorial serif, generous whitespace. The interface recedes so the trader's own words can sit at the center. Calm, never clinical; observational, never moralizing. Built to map cleanly onto Tailwind + shadcn/ui.

WORKING ASSUMPTIONS — CORRECT ME BEFORE PHASE 2

- **Wordmark** stays the full "Trader's Mirror" (Newsreader italic). No abbreviation.
 - **Mic interaction** assumed **tap-to-start** / **tap-to-stop** (more forgiving for 30-90s notes than press-and-hold). Easy to switch.
 - **Density** moderate-airy. Data-heavy screens (trade detail, project strip) get a refined mono for numbers so whitespace survives.
 - **Loss is clay, not red** — semantics are muted so the tool never feels like it's scolding.
-
